Water

Water is important for all living things,
Trees, roses, fish, and even human beings.

We have to keep our water clean,

Don't pollute; keep it green!

If we cut down trees and build lots of roads,

The rainwater has nowhere to go.

So the trash that we litter flows into our streams,

Our water full of oil, garbage and junk

Is bad for you, me, and even a chipmunk.

So take care of every ocean, stream, pond or lake,

Don't litter, FOR GOODNESS SAKE!
